**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Dan Thompson on 5/29/2003.

"The alternator of claim 6" in line 1, claim 8 should be written as --- The alternator of claim 1---.

"The alternator of claim 6" in line 1, claim 9 should be written as --- The alternator of claim 1---.

***Remarks***

2. In view of amendments and cancellation of claims 2-6, the Examiner withdraws the objection to the drawings, the specification, the rejection under 35 U.S.C 102(b) to claim 1 and the rejection under 35 U.S.C 103(a) to claims 2,5,10. Therefore, all the remaining claims are in condition for allowance.

***Allowable Subject Matter***

3. Claims 1,7-10,11-13 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not show an alternator comprising an inner housing, an outer housing mounted over said inner housing, said inner housing and said outer

housing defining a sealed flow chamber having a first plenum, an axial jacket, a second plenum, a first passageway interconnecting said first plenum and said axial jacket, a second passageway interconnecting said axial jacket and said second plenum, an inlet extending from said first plenum, and an outlet extending from said second plenum, said first passageway being defined by an arcuate notch formed within said first disk shaped portion of said inner housing diametrically across from said inlet such that coolant entering said first plenum must flow diametrically across said alternator to reach said first passageway, and said second passageway being defined by an arcuate notch formed within said third disk shaped portion of said inner housing diametrically across from said first passageway such that coolant entering said axial jacket through said first passageway must flow annularly around said alternator to reach said second passageway.
